P2 dossier - Energy engineer

Teach energy; lead Mission 01; explain physical examples.

Your front-of-room cues:

00:05-00:12 | Potential and kinetic energy | slides 6-10

00:12-00:18 | Mission 01: Energy Scan | slides 11-20

Across the whole lesson: After your mission, mentor Alpha; help P5 explain force reduction and review one design pitch.

Your zone: Alpha

Preparation: Rehearse each of the five situations, including the ramp sequence; explain potential energy as position/configuration rather than just being still.

Rehearsal: deliver your assigned segment at its budget, practise the incoming and outgoing handoff, then rehearse your secondary task while another presenter speaks.

Bring: this dossier, assigned speaker notes, a pen and cue timer if applicable. Know where the paper response cards and student dossiers are stored.

Success: students can explain the concept or complete the task; your partner receives a clear handoff; the mission lead and host never compete for the same device.

P2 - slide cues 1-5

Slide 6: OBJECTIVE:
Activate prior knowledge; open the unit with BOTH Get Ready questions.
TRANSITION:
'Two types. Let's meet the first one: potential energy.'

Slide 7: OBJECTIVE:
Define potential energy: stored energy of a still object (position).
TRANSITION:
'And when the ball moves? Kinetic energy.' -> next.

Slide 8: OBJECTIVE:
Define kinetic energy: the energy of motion.
TRANSITION:
'Now let's put them side by side.' -> comparison.

Slide 9: OBJECTIVE:
Contrast the two types and plant the key idea: potential energy can become kinetic energy.
TRANSITION:
'Enough talking - let's test your eyes. Game one: Energy Scan.'

Slide 10: OBJECTIVE:
Explain the game in 30 seconds.
TRANSITION:
'First situation.'

P2 - slide cues 6-10

Slide 11: TRANSITION:
Click -> answer.

Slide 12: TRANSITION:
Next situation.

Slide 13: TRANSITION:
Click -> answer.

Slide 14: TRANSITION:
Next situation.

Slide 15: TRANSITION:
Click -> answer.

P2 - slide cues 11-15

Slide 16: TRANSITION:
Next situation.

Slide 17: TRANSITION:
Click -> answer.

Slide 18: TRANSITION:
Next situation.

Slide 19: TRANSITION:
Click -> answer.

Slide 20: TRANSITION:
'Now let's learn the engineering vocabulary - with the Dynamics Engineer.' -> P3.

P2 - preparation, rehearsal and fallback

Study: Rehearse each of the five situations, including the ramp sequence; explain potential energy as position/configuration rather than just being still.

Partner check: rehearse with P9 for screen cues, P3 for timing and P8 for zone cover. P1 confirms that your secondary duty can continue without distracting from the active speaker.

During missions: follow the fixture-derived private answer sheets. Mentors listen to company discussion, give no answer before CLOSE, and check that one captain submits.

During teaching: circulate quietly, identify one misconception, and feed it to the lead at the next pause. During listening: no side explanations.

On failure: tell P1 what failed and P9 which question is affected. Do not independently restart, reseed, create another session or change scoring. Use the emergency section.

Personal rehearsal acceptance: name your incoming presenter; state your first line; perform the exact screen cue; finish within budget; give the next presenter a named handoff; complete one simulated failure.

After rehearsal: record actual elapsed time and unresolved questions. Confirm the official audio limitation, final 300 EP rule and post-class writing completion with your teammates.

P2 - one-page quick reference

Energy engineer

Primary: Teach energy; lead Mission 01; explain physical examples.

Cues:

00:05-00:12 | Potential and kinetic energy | slides 6-10

00:12-00:18 | Mission 01: Energy Scan | slides 11-20

Secondary: After your mission, mentor Alpha; help P5 explain force reduction and review one design pitch.

Zone: Alpha

Before class: Rehearse each of the five situations, including the ramp sequence; explain potential energy as position/configuration rather than just being still.

Handoff: finish one explanation, name the next stage and presenter, wait for acknowledgement. P9 changes the screen; P3 confirms time.

If stuck: ask P1 for the decision, P9 for devices, P8 for the room. At 30 seconds of unresolved connectivity, use the paper fallback on the same unscored question.

Remember: one submitting phone per company; no early answer reveal; Task 7 gap 5 ungraded; final B-D-A-C = 300 EP; writing is a draft now and completed after class.
