P5 dossier - Crash investigator

Lead reading and Mission 03; distinguish quoted text from supplementary science.

Your front-of-room cues:

00:42-00:56 | Seatbelt investigation | slides 35-40

00:56-01:03 | Mission 03: Crash Detective | slides 41-55

Across the whole lesson: Mentor Delta; supply science clarification during reading; review design reasoning with P7.

Your zone: Delta

Preparation: Read slides 35-40 and all seven statements. Separate literal reading answers from standard-physics clarification. Rehearse a three-minute reading window.

Rehearsal: deliver your assigned segment at its budget, practise the incoming and outgoing handoff, then rehearse your secondary task while another presenter speaks.

Bring: this dossier, assigned speaker notes, a pen and cue timer if applicable. Know where the paper response cards and student dossiers are stored.

Success: students can explain the concept or complete the task; your partner receives a clear handoff; the mission lead and host never compete for the same device.

P5 - slide cues 1-5

Slide 35: OBJECTIVE:
Give purpose before reading (scan for gist, not translation) - supports the textbook's Task 2 T/F.
TRANSITION:
'Time's up. Let's open the file.'

Slide 36: OBJECTIVE:
Teach WHY abstracts use this fixed structure (transfers to reading any report); this slide and the three that follow ARE Task 5.
TRANSITION:
'Background - the physics of a crash.'

Slide 37: OBJECTIVE:
Walk through the Background section, sentence by sentence, matching each claim to the crash diagram.
TRANSITION:
'So what did the tests actually measure? Results.'

Slide 38: OBJECTIVE:
Present the measured outcome (Results): force and Gs go down.
TRANSITION:
'Lower force is good - but WHY does that reduce injury? Conclusions.'

Slide 39: OBJECTIVE:
Deliver the causal chain of the Conclusions section - this is the answer to the mission-brief question.
TRANSITION:
'Let's put all three parts together - one picture, the whole discovery.'

P5 - slide cues 6-10

Slide 40: OBJECTIVE:
Fuse Background+Results+Conclusions into ONE memorable causal chain - THE slide to remember for the exam.
TRANSITION:
'Time to prove you caught every step. Game three: Crash Detective.'

Slide 41: OBJECTIVE:
Explain the True/False mechanic in 20 seconds.
TRANSITION:
'Statement one.'

Slide 42: TRANSITION:
Click -> answer.

Slide 43: TRANSITION:
Next statement.

Slide 44: TRANSITION:
Click -> answer.

P5 - slide cues 11-15

Slide 45: TRANSITION:
Next statement.

Slide 46: TRANSITION:
Click -> answer.

Slide 47: TRANSITION:
Next statement.

Slide 48: TRANSITION:
Click -> answer.

Slide 49: TRANSITION:
Next statement.

P5 - slide cues 16-20

Slide 50: TRANSITION:
Click -> answer.

Slide 51: TRANSITION:
Next statement.

Slide 52: TRANSITION:
Click -> answer.

Slide 53: TRANSITION:
Next statement.

Slide 54: TRANSITION:
Click -> answer.

P5 - slide cues 21-21

Slide 55: TRANSITION:

'You've earned the right to talk like engineers. Next: the Language of Engineers.' -> P6.

P5 - preparation, rehearsal and fallback

Study: Read slides 35-40 and all seven statements. Separate literal reading answers from standard-physics clarification. Rehearse a three-minute reading window.

Partner check: rehearse with P9 for screen cues, P3 for timing and P8 for zone cover. P1 confirms that your secondary duty can continue without distracting from the active speaker.

During missions: follow the fixture-derived private answer sheets. Mentors listen to company discussion, give no answer before CLOSE, and check that one captain submits.

During teaching: circulate quietly, identify one misconception, and feed it to the lead at the next pause. During listening: no side explanations.

On failure: tell P1 what failed and P9 which question is affected. Do not independently restart, reseed, create another session or change scoring. Use the emergency section.

Personal rehearsal acceptance: name your incoming presenter; state your first line; perform the exact screen cue; finish within budget; give the next presenter a named handoff; complete one simulated failure.

After rehearsal: record actual elapsed time and unresolved questions. Confirm the official audio limitation, final 300 EP rule and post-class writing completion with your teammates.

P5 - one-page quick reference

Crash investigator

Primary: Lead reading and Mission 03; distinguish quoted text from supplementary science.

Cues:

00:42-00:56 | Seatbelt investigation | slides 35-40

00:56-01:03 | Mission 03: Crash Detective | slides 41-55

Secondary: Mentor Delta; supply science clarification during reading; review design reasoning with P7.

Zone: Delta

Before class: Read slides 35-40 and all seven statements. Separate literal reading answers from standard-physics clarification. Rehearse a three-minute reading window.

Handoff: finish one explanation, name the next stage and presenter, wait for acknowledgement. P9 changes the screen; P3 confirms time.

If stuck: ask P1 for the decision, P9 for devices, P8 for the room. At 30 seconds of unresolved connectivity, use the paper fallback on the same unscored question.

Remember: one submitting phone per company; no early answer reveal; Task 7 gap 5 ungraded; final B-D-A-C = 300 EP; writing is a draft now and completed after class.
