P9 dossier - Technical co-pilot / final simulation lead

Operate host and projector; lead final sequence explanation while P3 briefly operates the host.

Your front-of-room cues:

01:42-01:44 | Mission 05: Final Crash Simulation | slides 84-86

Across the whole lesson: Monitor connectivity and projected state; execute the five host missions; keep offline score totals separate. Teach final cards at 102 minutes while P3 controls the host.

Your zone: No fixed zone: laptop station

Preparation: Rehearse host state transitions, PAUSE/RESUME, projector reopen, recovery code, manual adjustment with reason, and final B-D-A-C. Verify deployed content against this source snapshot before class.

Rehearsal: deliver your assigned segment at its budget, practise the incoming and outgoing handoff, then rehearse your secondary task while another presenter speaks.

Bring: this dossier, assigned speaker notes, a pen and cue timer if applicable. Know where the paper response cards and student dossiers are stored.

Success: students can explain the concept or complete the task; your partner receives a clear handoff; the mission lead and host never compete for the same device.

P9 - slide cues 1-3

Slide 84: OBJECTIVE:
Build final drama - highest-stakes moment of the lesson (double EP).
TRANSITION:
'Here is your sequence - out of order.'

Slide 85: OBJECTIVE:
Whole-class final check: sequence the crash-to-safety causal chain from memory.
TRANSITION:
'Reveal!'

Slide 86: OBJECTIVE:
Confirm the sequence and its meaning together.
TRANSITION:
'Mission complete.'

P9 - preparation, rehearsal and fallback

Study: Rehearse host state transitions, PAUSE/RESUME, projector reopen, recovery code, manual adjustment with reason, and final B-D-A-C. Verify deployed content against this source snapshot before class.

Partner check: rehearse with P9 for screen cues, P3 for timing and P8 for zone cover. P1 confirms that your secondary duty can continue without distracting from the active speaker.

During missions: follow the fixture-derived private answer sheets. Mentors listen to company discussion, give no answer before CLOSE, and check that one captain submits.

During teaching: circulate quietly, identify one misconception, and feed it to the lead at the next pause. During listening: no side explanations.

On failure: tell P1 what failed and P9 which question is affected. Do not independently restart, reseed, create another session or change scoring. Use the emergency section.

Personal rehearsal acceptance: name your incoming presenter; state your first line; perform the exact screen cue; finish within budget; give the next presenter a named handoff; complete one simulated failure.

After rehearsal: record actual elapsed time and unresolved questions. Confirm the official audio limitation, final 300 EP rule and post-class writing completion with your teammates.

P9 - one-page quick reference

Technical co-pilot / final simulation lead

Primary: Operate host and projector; lead final sequence explanation while P3 briefly operates the host.

Cues:

01:42-01:44 | Mission 05: Final Crash Simulation | slides 84-86

Secondary: Monitor connectivity and projected state; execute the five host missions; keep offline score totals separate. Teach final cards at 102 minutes while P3 controls the host.

Zone: No fixed zone: laptop station

Before class: Rehearse host state transitions, PAUSE/RESUME, projector reopen, recovery code, manual adjustment with reason, and final B-D-A-C. Verify deployed content against this source snapshot before class.

Handoff: finish one explanation, name the next stage and presenter, wait for acknowledgement. P9 changes the screen; P3 confirms time.

If stuck: ask P1 for the decision, P9 for devices, P8 for the room. At 30 seconds of unresolved connectivity, use the paper fallback on the same unscored question.

Remember: one submitting phone per company; no early answer reveal; Task 7 gap 5 ungraded; final B-D-A-C = 300 EP; writing is a draft now and completed after class.
